any other comparable BOP on the market today. In addition to a hydraulic ram change that enables easier access to service the rams, the ES Series features a balanced piston on the shear actuator, which eliminates the effects of well pressure when shearing. ES Series Coiled Tubing BOP - National Oilwell Varco Coiled tubing drilling (CTD) is rapidly becoming the drilling method of choice for underbalanced horizontal re-entry drilling in wells with fragile formations. Fast rig-up and shorter trip times make CTD cost-effective and generally results in higher production rates than conventional overbalanced drilling techniques.
